

Sustainable Value Networks

Our Sustainable Value Networks (SVNs) are a tool to help integrate sustainable practices into all parts of our business.

Developing solutions — together

SVNs bring together leaders from our company, supplier companies, academia, government, and non-governmental organizations (NGOs.) Together, we explore challenges develop solutions that benefit our business and our local and global communities.

Positive changes

Our SVNs have already unleashed a wealth of innovation and insight resulting in numerous positive changes to our business operations. We've improved energy use and efficiency, reduced or recycled waste, and increased introduction of environmentally friendly and organic products.

Our SVNs include:

- [Greenhouse Gas](#)
- [Sustainable Buildings](#)
- [Alternative Fuels](#)
- [Logistics](#)
- [Waste](#)
- [Packaging](#)
- [Wood & Paper](#)
- [Agriculture and Seafood](#)
- [Textiles](#)
- [Jewelry](#)
- [Electronics](#)
- [Chemical Intensive Products](#)
